

— AI · DATA · AUTOMATION

Dixon Choi

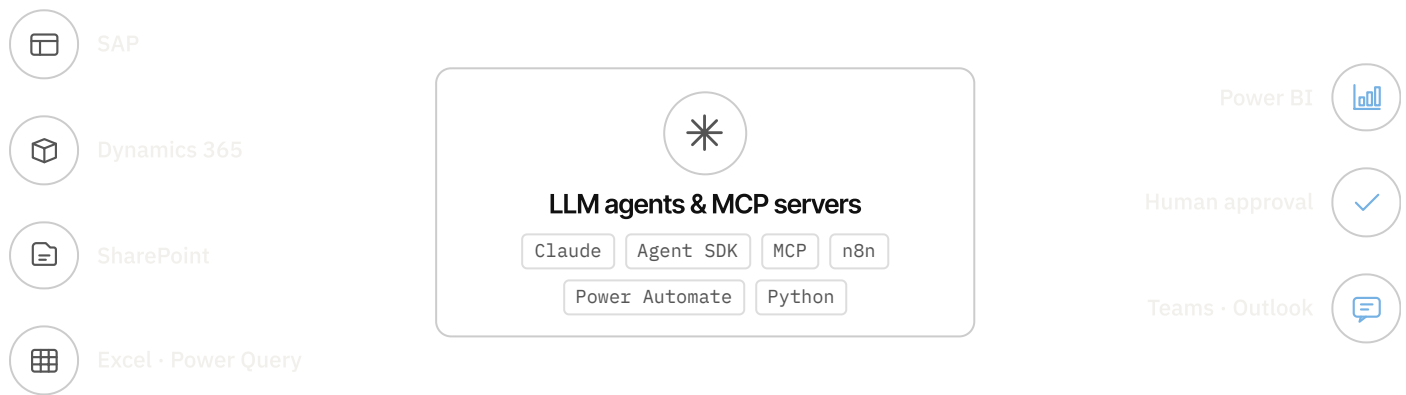

I build the AI that procurement teams actually run on.

Sole technical lead in a two-person procurement PMO at Gategroup, covering seven European countries: spend data, workflow automation, and LLM agents wired into the systems those teams already work in. On the side I run DDX Consulting, where I build automations for other companies and then run them.

📍 London, UK ✉ choimanto62@gmail.com 🔗 LinkedIn 🐙 GitHub

THE STACK I BUILD ON

Scattered source systems on the left, the automation layer I build in the middle, and the place a decision gets made on the right. Nothing reaches the outside world without a person approving it.

TOOLS I WORK IN

— AI & automation

Claude / Anthropic API MCP servers Claude Agent SDK
Gemini GenAI solution design n8n Power Automate
Intelligent automation Prompt engineering

— Procurement & systems

SAP Dynamics 365 SharePoint Power Platform
Source-to-Pay / P2P Spend analytics
Supplier relationship management
Budgeting & KPI development ERP data consolidation

— Data & BI

Power BI Power Query (M) DAX SQL
Python · pandas Tableau GIS / shapefiles
Machine-learning forecasting Excel data models

— Build

TypeScript Next.js React Prisma Postgres
React Native · Expo Firebase Git

EXPERIENCE

Nov 2021 — present

Apr 2025 –
Present

PMO Europe Procurement Analyst

Gategroup, London, UK

- Sole technical lead in a two-person Procurement PMO driving an end-to-end digital transformation across seven European countries, owning solution design, build and delivery of the process, data, automation and AI the procurement teams run on.
- Designed and deployed in-house, LLM-based AI agents for the European procurement team: contract review, supplier discovery and negotiation support.
- Built Model Context Protocol (MCP) servers to connect AI agents securely to internal procurement data and systems (spend, contracts, suppliers), enabling AI-driven workflows on live data.
- Automated core procurement workflows with Power Automate: supplier communications, invoice and rebate collection, and budget submission.
- Built a full Power BI reporting suite from scratch covering direct and indirect spend, inflation, impact and budgeting, consolidating data from multiple ERP systems using Power Query (M), DAX and SQL.
- Built the global Supplier Relationship Management (SRM) programme from scratch, defining the process and delivering the supporting solution in Power Automate, SharePoint and Power BI, including supplier scorecards and performance reporting used across the European teams.
- Developed KPI frameworks quantifying procurement impact and cost-avoidance beyond headline savings, supporting category and sourcing decisions.

2025 –
Present

Founder

DDX Consulting · ddx-consulting.com

Custom ERP and process design, systems integration and automation for procurement, supply chain, sales and marketing teams. DDX builds them, then runs them. Clients watch every run and sign off anything that reaches the outside world, from Tally, the workspace I built for exactly that.

Sep 2024 –
Dec 2024

Graduate Data Analyst

Useful Projects, London, UK

- Owned the full data lifecycle for carbon analysis, from identifying carbon hotspots to forecasting decarbonisation roadmaps, with visualisation in Power BI and GIS.
- Produced carbon footprint reporting to RICS and GHG standards, advising clients on decarbonisation strategy across energy, material and operational areas.
- Worked with engineering, energy and leadership stakeholders to define key metrics and shape the analysis roadmap.

Dec 2023 –
Jan 2024

Data Analyst

Southeast London Community Energy, London, UK

- Advised the energy-poverty team on service delivery by analysing open data with Python and Excel, contributing to a 10% increase in the service's utilisation rate.
- Sourced and validated open-source data with Python and Tableau, identifying poverty and poor-energy-performance hotspots visualised with government GIS shapefiles.
- Presented findings and a refined priority strategy to senior management in report and presentation form.

Feb 2023 –
May 2023

Data Analyst Trainee

Generation, London, UK

- Built integrated solutions for large, multi-source datasets using Python (web scraping), SQL and Excel for storage and cleaning, and Power BI for visualisation.
- Mentored team members and produced training materials, simplifying complex concepts and often extending solutions beyond the standard course framework.

Nov 2021 –
Aug 2022

Business Analyst (Placement)

Skywise Engineering, Hong Kong

- Led a digital transformation from physical record-keeping to an engineering project-management system, owning the full lifecycle: requirements, impact assessment, prototyping, development, UAT and integration.
 - Built a Jira-based project management dashboard using agile methodology to track KPIs, deadlines and milestones, contributing to a 5% reduction in project timelines.
 - Ran requirement-gathering with staff and clients through surveys and interviews, and managed change through communication, training and feedback, improving client satisfaction by 10%.
-

AUTOMATION DELIVERED

DDX engagements, anonymised by sector. The DDX site names no client, and neither does this page.

EDUCATION

Oct 2019 –
Jun 2023

BSc Computer Science with Artificial Intelligence

University of Leeds, UK

Sep 2018 –
Jun 2019

Foundation Degree in Science

Chase Grammar School, UK

Sep 2016 –
Jun 2018

GCSE

Chase Grammar School, UK

Got a process worth automating?

Procurement, supply chain, or anything where the data is scattered and the workflow is still manual. Email is the fastest way to reach me.
